

Lip and Cheek Stain

ARL-24-111-1

<u>PHASE A</u>	% W/W
Deionized Water	96.50
Butanediol (Butanediol)	1.00
Pelemol® G7A¹ (Glycereth-7 Triacetate)	1.00
<u>PHASE B</u>	
Phenothix® APT¹ (Ammonium Polyacryloyldimethyl Taurate)	0.90
<u>PHASE C</u>	
Red 33 ² , 2.50% Aqueous Solution (Red 33, Water)	0.60
<u>PHASE D</u>	
Preservative	q.s
	100.00

1. **Phoenix Chemical, Inc.**
2. Sensient Technologies

Procedure:

In main kettle, charge water and add with slow mixing remaining ingredients of Phase A until uniform. Increase agitation and sprinkle in Phenothix APT, Phase B until dispersed and a uniform gel has formed. Add Phase C and continue mixing until color is homogenous. Add Phase D and mix until uniform.

INGREDIENT	FUNCTION
Phenothix APT	Efficient thickener for water-based systems.
Pelemol G7A	Water soluble ester that produces a slightly dry, silky emollience on the skin.
